

# How Much is Enough, or Too Much?

These are good guidelines for evaluating and comparing foods based on their nutrition labels. The recommendations are for EACH DAY.

## FAT

For each 100 calories in a food: —————>  
 No more than 3g of total fat. —————>  
 No more than 1g of saturated fat. —————>  
 As little *trans* fat as possible.

## CHOLESTEROL

If your doctor gives you a number, stick to it. Otherwise aim for less than 200mg per day.

## SODIUM

Try to stay under 1500mg.

## FIBER

One g for each 100 calories, or:  
 Women: 25-30g  
 Men: 28-35g

## CALCIUM

Aim for 1200mg a day.

For ages 50+, the DAILY needs are:  
 Women-about 1800 calories, and  
 Not more than 60g of fat per day.  
 Men-about 2200 calories, and  
 Not more than 75g of fat per day.

For diabetes, 15g total carbohydrate is 1 portion.

If a food contains more than 6 g of sugar alcohol the quantity must be listed in the carbohydrate section. Excess may cause diarrhea.

<b>Nutrition Facts</b>			
Serving Size 1 cup (228g)			
Servings Per Container 2			
Amount Per Serving			
Calories	250	Calories from Fat	110
		% Daily Value	
Total Fat	12 g		18%
Saturated Fat	3g		15%
<i>Trans</i> Fat	1.5g		
Cholesterol	30mg		10%
Sodium	470mg		20%
Total Carbohydrate	31g		10%
