Safety Plan Analysis Worksheet

Directions:

- Include explanations for each response.
- Align your responses with the case information presented to you.
- Resist the temptation to make up information or make assumptions.
- If more information is essential - but not provided - specify what information is missing and explain its significance.

Questions:

1. What is the danger (safety) threat?

2. How are the children vulnerable?

3. What is known about protective capacities?
4. What safety decision is most congruent with available case information and in alignment with danger threats, child vulnerability and protective capacities, plus diligent efforts and least restrictive setting?

5. What safety actions are needed?

6. What should be in the monitoring and compliance verification plan?
